¹ This column lists each MSA area name and each county or county equivalent, in the MSA area. Counties not listed in this table are considered to be Rural Areas. Wage index values for these areas are found in Chapter 11, Addendum C (FY 2004).

² Wage index values are based on FY 2000 hospital cost report data before reclassification. The wage index is further adjusted. Wage index values greater than 0.8 are subject to a budget-neutrality adjustment of 1.061238. Wage index values below 0.8 are adjusted to be the greater of a 15-percent increase, subject to a maximum wage index value of 0.8, or an adjustment by multiplying the hospital wage index value for a given area by the budget-neutrality adjustment. We have completed all of these adjustments and included them in the wage index values reflected in this table.

¹ This column lists each MSA area name and each county or county equivalent, in the MSA area. Counties not listed in this table are considered to be Rural Areas. Wage index values for these areas are found in Chapter 11, Addendum C (FY 2004).

² Wage index values are based on FY 2000 hospital cost report data before reclassification. The wage index is further adjusted. Wage index values greater than 0.8 are subject to a budget-neutrality adjustment of 1.061238. Wage index values below 0.8 are adjusted to be the greater of a 15-percent increase, subject to a maximum wage index value of 0.8, or an adjustment by multiplying the hospital wage index value for a given area by the budget-neutrality adjustment. We have completed all of these adjustments and included them in the wage index values reflected in this table.
